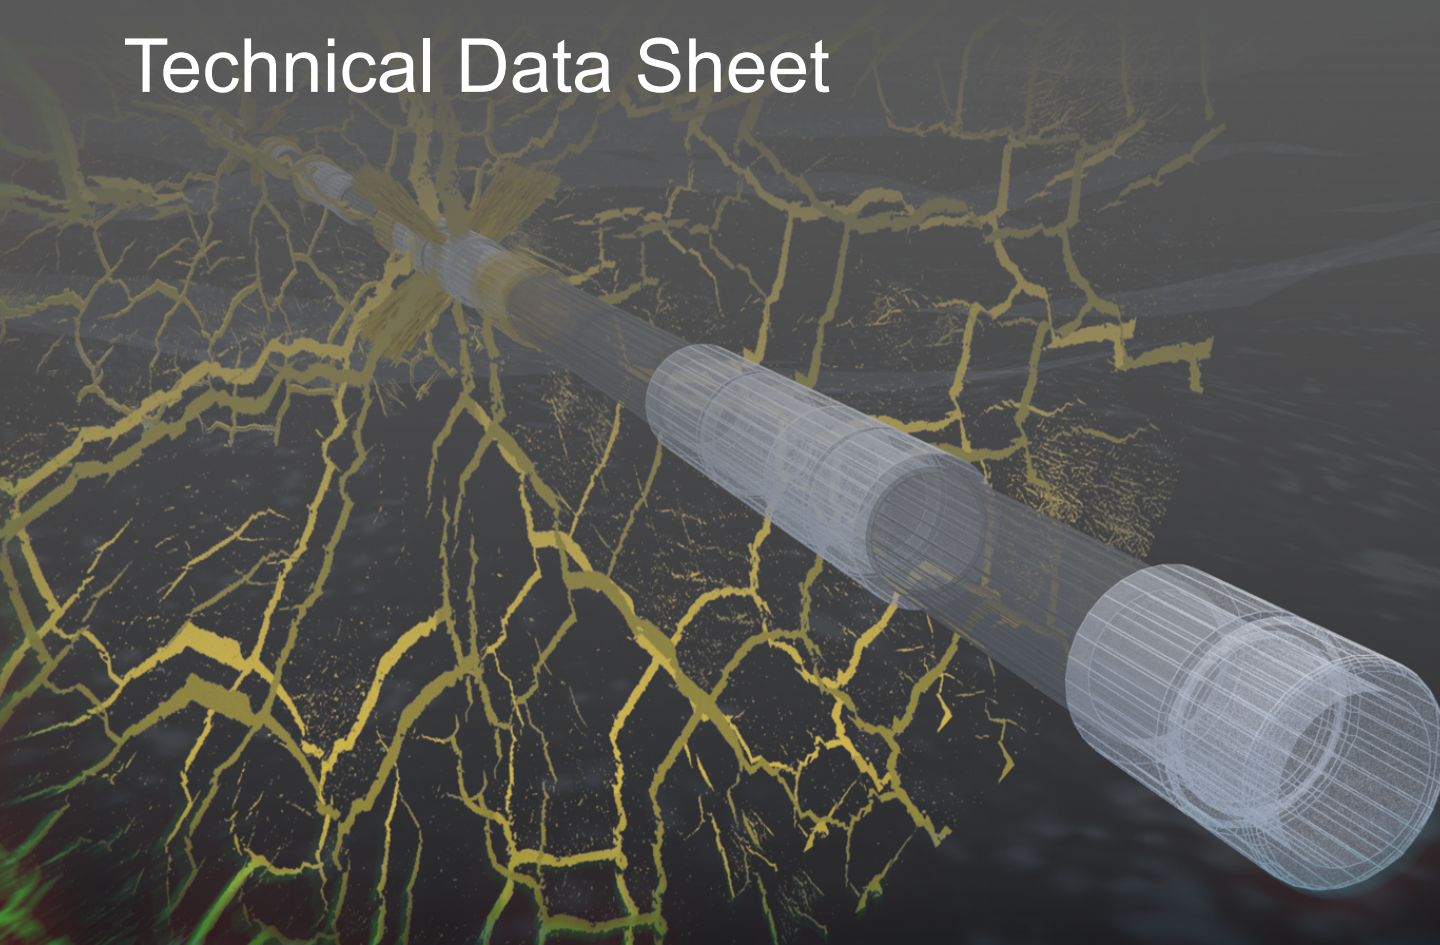
Frontier Drill Pipe Wiper Dart

Technical Data Sheet



Drill Pipe Wiper Dart

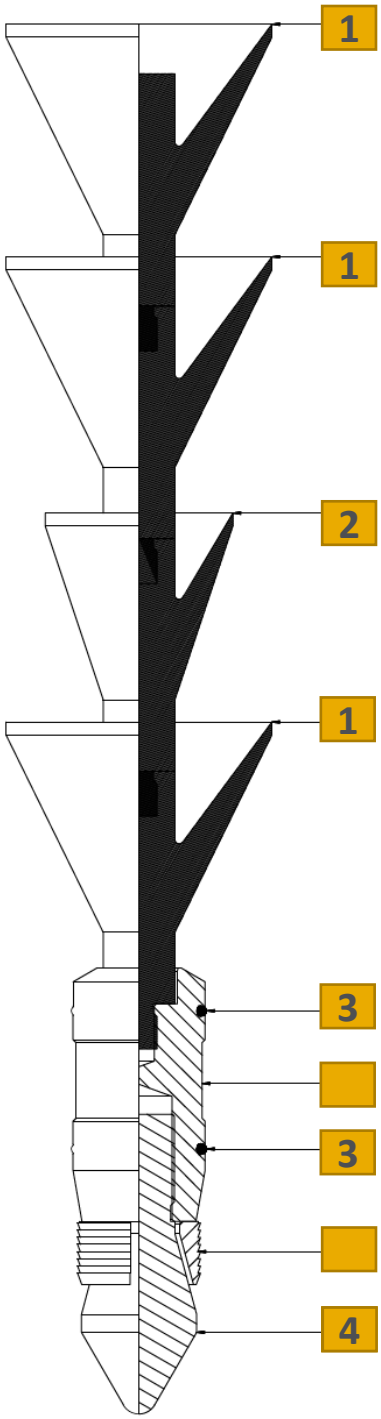
Frontier Oil Tools

OVERVIEW

Drill Pipe Wiper Plug (DWP) is a rubber wiping device used in liner hanger applications. Dropped from the surface, the DWP provides a means of separation between cement and displacement fluid (drilling mud) preventing cross-contamination during liner cementation. It also serves to wipe the internal diameter (ID) of the drill pipe to prevent sheathing or sticking of cement to the inside of the drill pipe.

FEATURES

- Field-customizable fin configuration
- 3 & 4 Fin Configurations Available
- Latching nose locks and seals securely into liner wiper plug
- Allows for proper displacement indication during liner cementation
- Locking mechanism to prevent rotation during drill out
- The flexible fins are available in most drill pipe and tubing size combination



Specifications and Dimensions

Dril Pipe Size	Dim 1	Dim 2	Dim 3	Dim 4
3-1/2"	3.13"	2.13"	1.844"	1.605"
4"	3.71"	2.62"	1.844"	1.605"
4-1/2"	4.50"	3.13"	2.180"	1.977"
5"	4.50"	3.13"	2.180"	1.977"

Frontier Oil Tools is a subsidiary of NewTech Services Holding Limited, an international oilfield services company fou*nded in 2009.*

NewTech Services Holding Limited develops technology and expertise within 4 Business Divisions: Drilling Services, Completion Systems, Integrated Project Management and Capital Equipment.

NewTech Services Holding Limited supplies technology products and services to the oil and gas exploration and production industry in Russia and CIS, Europe, Middle East, North and South America.

Frontier Oil Tools is a subsidiary of NewTech Services Holding Limited specializing in completion technology products and services.
